

# NATURALLY OCCURRING ASBESTOS

TUESDAY SEPTEMBER 1, 2015, 6:00 PM TO 8:00 PM

AT THE BOULDER CITY LIBRARY, 701 ADAMS BOULEVARD.

---

## "Naturally Occurring Asbestos in Southern Nevada and Adjacent Areas of Arizona"

Speakers will include *Dr. Brenda Buck* and *Dr. Rodney Metcalf*, the UNLV geologists who discovered naturally-occurring asbestos in the Boulder City area, and reported it in a scientific paper in October 2013.

## "Health Effects of Asbestos: What we've learned from Libby, MT and Marysville, Ohio"

*Dr. David Berry*, senior toxicologist with the U.S. Environmental Protection Agency, who specializes in minerals like asbestos.

Panel Discussion with Audience

### ***New York Times***

By DEBORAH BLUM JANUARY 17, 2014

*"It has the potential to be a huge deal," said Christopher P. Weis, toxicology adviser to the director of the National Institute for Environmental Health Sciences. "And we want to get the word out, because this is something that can be addressed if we tackle it upfront."*
